

### SPECIFICATION

model	YH-1700/YH-1600
working width	1700mm/1600mm
Max laminating width(mm)	1680/1580mm
warm-up time(min)	10-15
Input voltage(v)	110/220V
Way of laminating	Auto
Adjust range of speed	0-4m/min
Max laminating thickness(mm)	30 mm
Diameter of silicone roll	13cm
Temperature range	10°C-140°C
weight(kg)	250Kg/230Kg

### CHARACTERISTIC

1、 can overturn the front working table which is easy to maintain and fix machine, also save your place.	2、 can adjust, scroll the roll, which ensure the picture smooth and slippy, even for the thin adhesive can be done well.
3、 auto take up paper and adjust it's degree of tightness, which make the laminating nice.	4、 pare stand for spare roll film, convenience for use
5、 take up the bottom film after it was laminating.	6、 can do hot laminating and cold laminating job.
